

You Are Invited.....
**"Camp-to-Camp" Roundtable, Lunch and
Demonstration by HCI**
Tuesday, October 7 – 11 AM until 2 PM
Mt. Lebanon Camp & Retreat

HCI mostly deals in two-way radios, repeaters, FCC licenses when needed, etc. They are also dealers for the Ritron "Loudmouth" PA systems that are designed as emergency speakers that camps will be required to have going forward. It will work with any business band two-way radio system.

Their team is going to set up a system here at Mt. Lebanon on Tuesday, October 7 from 1 to 2 so we can actually see it in action, get a feel for how loud they are, ability to hear indoors, etc. Hopefully that will give us a good idea of how many you/we would need around the property. They work via two-way radio, not wifi, which is one of the State requirements. I expect they'll also have some special pricing to present by then...that was my main request to both companies.

Any area camp leaders who want to drive over to take a look/listen are welcome. While we're at it, let's plan to network a bit beforehand. We will host a "Camp-to-Camp" roundtable at 11am, Mt. Lebanon will provide a nice lunch at noon as we continue visiting (or hear about their systems), then we'll see their demo afterward and you can meet their sales team. I'm certain they would do similar demonstrations in various parts of the state but if you know people near Dallas, please spread the word. It doesn't have to be CCCA members...any camp leader is welcome. **Please [RSVP here](#) by Thursday, October 2 for lunch.**

11 AM Camp-to-Camp Roundtable
12 PM Lunch
1 PM Demonstration by HCI

I know it's short notice, but hope you can come connect and talk through or find new solutions.
We hope to see you on Tuesday, October 7.
